ABSTRACT OF THE DISCLOSURE

a SA The invention relates to ^aremovable filter for buried catch
basins. The filter includes a bag located below grade level in the
5 catch basin and looped flaps which extend above grade level and aid
in removal of the filter from the catch basin. The filter is held
in place in the basin by a heavy grate which rests on the flaps.
c ^{The flaps}
10 ~~Flaps~~ extend at grade level away from the grate. The filter is
removed from the catch basin for dumping by inserting a lift rod in
each flap loop and hooking lift chains to the rods at openings in
the loops. EA
